EDUCATION

University

Thammasat University

Bachelor of Science in Statistics
(Aug 2016 - May 2020)

ADDITIONAL TRAINING

Generation Thailand – Software Developer Bootcamp (2022)

Learned software development fundamentals and JavaScript
Built projects and practiced Agile teamwork.

TECHNICAL SKILLS

- **Programming** : Python, SQL, R, JavaScript, C++
- **Data Visualization**: MS Power BI, Google Data Studio
- **Tools**: MS Excel, Google Sheets, IBM SPSS
- **Database**: MongoDB, SQLITE
- **Core Skills**: Data Analysis, Data Preparation, Statistical Modeling

PROFILE

Data Analyst with a strong foundation in Statistics and hands-on experience in Python and SQL. Skilled in analyzing complex datasets and building data-driven solutions to support business decision-making. Experienced in data visualization and statistical modeling, with a focus on delivering actionable insights.

PROJECT EXPERIENCE

- Electricity Demand Forecasting (Time Series Analysis)
- Analyzed historical electricity consumption data to identify trends and seasonal patterns
- Built forecasting models using ARIMA, SARIMA, and Modified SARIMA
- Evaluated model performance and selected the optimal model with lowest error
- Achieved high prediction accuracy (MAPE: 1.57%)
- Created data visualizations to clearly communicate insights
- Impact: Improved demand forecasting accuracy to support planning and decision-making

SOFT SKILL

- Analytical Thinking
- Problem Solving
- Data Storytelling
- Business Insight Generation
- Growth Mindset

Certifications

- Data Preparation – Thai MOOC
- SQL Course – Codecademy
- Power BI for Beginners – Thai MOOC
- MongoDB Basics – MongoDB University
- MongoDB for SQL Experts – MongoDB University
